Average of 3 Numbers

```c
#include <stdio.h>
#include <conio.h>
void main()
{
    int n1, n2, n3;
    void avg (int a, int b, int c);
    clrscr();
    printf("Enter three numbers");
    scanf("%d%d%d", &n1, &n2, &n3);
    avg (n1, n2, n3);
    getch();
}
void avg (int a, int b, int c)
{
    float average;
    average = (a+b+c)/3.0;
    printf("Average = %f", average);
}
```
